CALL FOR PAPERS

Special Issue

TITLE: Responsible Digital Business: AI Governance, Cyber Risks, Ethics and Inclusive Organisation

MESSAGE FROM THE GUEST EDITOR

Dear Colleagues and Researchers,

This special issue focuses on enhancing the understanding of responsible digital business. It explores how organisations can harness emerging digital technologies while ensuring responsible governance, effective cyber risk management, the integration of ethical principles in decision-making and inclusive organisations. The issue gathers multidisciplinary insights to analyse the connections among AI governance, cyber risks, digital ethics, and inclusive practices. It especially invites research that examines practical governance mechanisms, organisational capabilities, and strategies for fostering trustworthy and resilient digital business. This special issue invites conceptual, empirical, theoretical, and interdisciplinary submissions that examine responsible digital business within organisations across various sectors and geographic regions. Areas of interest include, but are not limited to:

AI Governance and Responsible AI

- AI governance frameworks
- AI and organisational governance
- Responsible and trustworthy AI
- AI accountability, transparency and explainability
- Algorithmic bias and fairness
- Human oversight and human-AI collaboration
- AI regulation, standards and organisational compliance
- AI risk management and assurance
- Ethical decision-making in AI-enabled organisations

Cyber Risks and Digital Resilience

- Cybersecurity governance
- Cyber resilience and organisational preparedness
- Cyber risk management in AI-enabled organisations
- Privacy and data protection
- Cybersecurity culture and employee behaviour
- Digital trust

Digital Ethics and Responsible Innovation

- Ethics of emerging technologies
- Digital responsibility and corporate responsibility
- Data ethics
- Ethical challenges associated with generative AI
- Responsible innovation and technology
- Digital accountability
- Ethical leadership in digital transformation
- Responsible technology adoption

Inclusive Digital Organisations

- Discrimination
- Digital inclusion
- Diversity, equity and inclusion in the digital workplace
- Inclusive AI
- Gender and diversity in digital leadership
- Digital skills, reskilling and workforce development
- AI and the future of work
- Employee well-being in the digital workplaces
- Digital transformation

Dr. Cheryl A. Genga
Main Guest Editor

Department of Management,
Walter Sisulu University,
South Africa
Email: cheryl.genga@gmail.com

Biography:

Dr Cheryl Akinyi Genga is a Part-Time Lecturer at Jomo Kenyatta University of Agriculture and Technology and a Postdoctoral Research Fellow at Walter Sisulu University. She holds a Doctorate in Management and possesses extensive expertise in sustainable human resource management, with a particular emphasis on diversity, equity, and inclusion. With more than eight years of experience spanning academia, research, and consultancy, Dr Genga has developed a strong interdisciplinary research portfolio covering gender studies, digital transformation, diversity management, organisational sustainability, leadership, and organisational management. Her scholarly work focuses on understanding how emerging technologies and sustainable management practices can enhance organisational effectiveness, inclusivity, and long-term resilience. As an active researcher and postgraduate supervisor, Dr Genga has contributed to knowledge creation through research, academic mentorship, and collaborative projects. Her expertise encompasses research design, strategic knowledge production, capacity development, and evidence-based policy and management practices. She is particularly committed to advancing sustainable organisational practices and contributing to research that supports institutional development and broader socio-economic transformation.
